

Annex 2.

The thesis should be organized as follows:

1. Summary
2. Introduction:
 - Provide a very brief introduction that outlines the background of your thesis topic.
3. Objective:
 - Include a section that describes the company where your internship was carried out and the fields of activity.
 - Clearly explain the role you played and the specific subject matter you focused on during your internship.
 - Define the objective of your thesis within this context.
4. Methodological Approach:
 - Describe the methods used in your work.
 - If your work was carried out in a laboratory, detail the materials (e.g., reagents), instrumentation, and the experimental methods employed.
 - If your work involved activities related to regulatory aspects, marketing or similar, explain how the research was conducted. For example, outline the use of databases, questionnaires, regulations, decrees, etc. A case study can be chosen.
5. Results and conclusion:
 - Present the data obtained using figures and tables, commenting the results and analysing the output of your work.
 - Conclude with a brief paragraph summarizing the findings.
6. References:
 - List any bibliographic sources used
7. Acknowledgments (if relevant)
